FREE SPACE RADAR TECHNICIAN TRAINING COURSES This Radar Course is an open space ToF course for level that will start by providing maintenance and engineering personnel with a basic understanding of numerous ToF technologies. This basic portion will focus on concepts applicable to virtually any manufacturer's equipment. Following this introduction, we will proceed with in-depth training on Radar technology that will include a variety of radar types. The class will be a combination of classroom and hands on training on the Process Training Unit, a full-scale, working process skid with on-line instrumentation and controls.

One Day

7:30 pm - 4:30 pm

Specifically covers:

- Radar Transmitters
- Envelope Curve Evaluation
- ToF Tooling
- ToF Applications
- Troubleshooting and Repair
- Set up and commission of Radar level instruments
- Use on-board and pc-based instruments to set up and verify health of interfaces and signals
