

INDUSTRY SEGMENTS

- Water/Wastewater

Vector CAG and Endress+Hauser together provide you the expertise and right solutions to ensure your facility is supplying safe water to your community. Clean water is critical to our public health. The water that we drink must be properly disinfected to ensure it is safe for consumption.

Endress+Hauser's EPA compliant Free Chlorine Analytical System ensures the water delivered to the public is free of harmful organisms that are detrimental to the public health.
