1:00PM-1:45PM CST

2021 LEARN FROM THE EXPERTS WEBINAR/VIDEO SESSION

You're invited to join the Vector Controls & Automation Group for our "Learn From The Experts" educational webinar/video conference sessions. These sessions are an online technical training webinar or video conference and are intended for our customers in the automation, instrumentation, mechanical and analytical fields. The complimentary 45 minute training sessions are conducted by Vector CAG personnel and industry guest speakers.

FAST THAT LASTS – HOW RETROFIT3D CAN BRING VALUE TO YOU!

How can your plant run more efficiently, have the issues at hand addressed more effectively, and increase the reliability of your plant? Join Vector CAG and manufacturing partner, IMI CCI as they share why Retrofit3D is the answer!

Keeping your plant running and performing at its peak is a challenging job, especially when valves are not performing as they should. Valves experiencing erosion, flashing, cavitation, noise, and vibration very often lead to leakage, which ultimately impacts plant performance negatively and results in low reliability. These problems can lead to constant, unplanned maintenance, or a replacement of the full valve.

Retrofit3D is a high-performance valve trim upgrade solution utilizing state-of-the-art additive manufacturing and traditional manufacturing methods to increase the reliability and performance of plant operations. Additionally the following will be discussed during the session;

- What are damage mechanism in control valves?
- Why should we consider fluid velocity principles?
- Introduction to Drag® technology.
- What is a Retrofit3D solution and how does it address the root cause of many control valve challenges?
- Case Studies
- Process for a Retrofit3D execution
- Applications to consider for Retrofit3D

Together, Vector CAG and IMI CCI offer you the best solution to ensure your plant is running its best with Retrofit3D!

Vector Host and Moderator

Dan Hebert
VP Mechanical Solutions

IMI CCI Subject Matter Expert

Christian Buehler
Business Leader – Retrofit3D
