

Flare Solutions

Customized Engineered Solutions

Our Expertise

Vector CAG is your analyzer technology partner for any size project. We deliver economical fit-for-purpose solutions that meet your process and regulatory compliancy. We work with your team as a technology partner from concept and engineering design through assembly and startup. We can even provide an ongoing maintenance contract to ensure life cycle management and regulatory compliance.

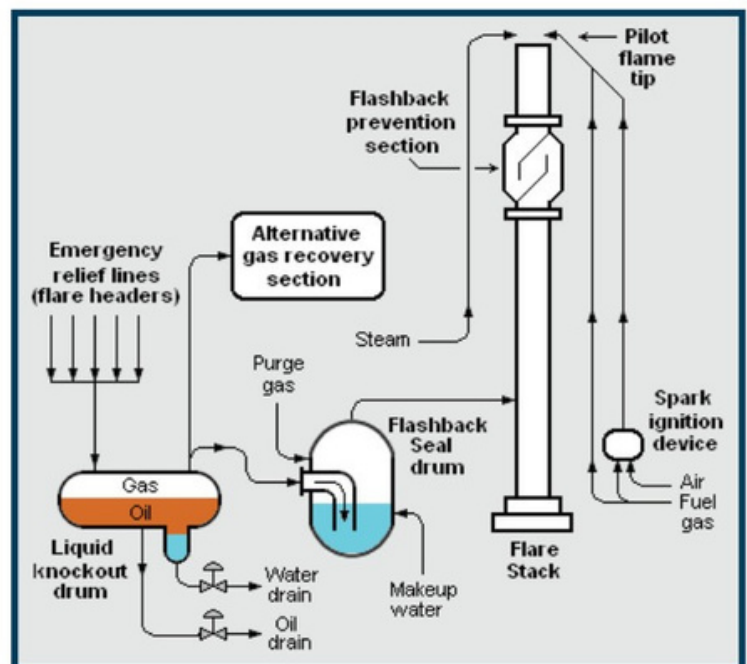

Integrated Flare Solutions Partner

With over 15 years of experience in Flare Compliance and Control, Vector CAG is your best partner for complete Flare Analyzer Solutions. We have successfully engineered and delivered hundreds of flare measurement systems for various types of gas and regulatory compliance applications.

We provided solutions that include analyzers, flowmeters, pilot monitors, and even trace smoke point detection. Vector CAG has the experience, knowledge, capability and technology to provide simple and complex engineered solutions.

- Analyzers for applications including high dew point and corrosive samples
- Hydrogen and Methane measurements
- Gas Flowmeters for all types of applications
- Pilot Cameras that monitor trace smoke points
- Steam Flowmeters with large turndown ratios
- Natural Gas Flowmeters with zero pressure drop

Integration Shop Capabilities

Vector CAG's 22,000 sq. ft. state of the art integration shop ensures efficiency. Our strategic procurement leverages best-in-class manufacturing partners to minimize costs and meet critical lead times, with dedicated specialists ensuring seamless delivery schedules and expedited materials.

Vector CAG's QA/QC program, which is TDLR certified, guarantees quality at every stage. We conduct Pre-FAT before customer FAT, testing entire systems per required specs. Additionally, we provide gas blends to challenge analyzer and sample systems, ensuring accuracy and reliability.

- Turnkey solutions
- Design, engineer, build, install, commission, service
- Work with any combination of analyzer manufacturers
- Built to local building codes and standards
- Continued long-term support

What Makes Vector Different?

- Turnkey solutions
- Provide a Best in Class integrated product
- Design, engineer, build, install, commission, service
- Work with any combination of analyzer manufacturers
- Meets area classification
- Built to local building codes and standards
- Design engineering available
- Continued long-term support
