

UPCOMING WEBINAR/VIDEO SESSION

Learn From The Experts

Your invited to join the Vector Controls & Automation Group for our "Learn From The Experts" educational webinar/video conference sessions. These sessions are an online technical training webinar or video conference and are intended for our customers in the automation, instrumentation, mechanical and analytical fields. The complimentary 45 minute training sessions are conducted by Vector CAG personnel and industry guest speakers.

**THURSDAY
7.30.2020**

Upcoming Session: Thursday, July 30th - 1:00PM-1:45PM CST

The Weight is Over! A Better Way to Maintain Your Weighing Systems

- **C2 Calibration** – Calibration without test weights that is certified, traceable, and meets ISO standards. Lowers services cost and limits exposure to outside service technicians.
- **Embedded Web Server** – Local or remote connection from any network connect PC or Smart Device browser.
- **Integrated Technician** – Remote diagnostic tools, safe, fast, and easy to use. No software needed.
- **One Mount Precision Sensors** – Versatile installation, self-centering with 360 degree checking. No dummy loadcells required!

Hardy is "Keeping it Simple". Our belief is that simplicity delivers our promise of easy and lowest cost of ownership. We didn't know COVID-19 was coming when we started manufacturing these weighing systems. They can be calibrated at a push of a button, reducing the need for outside technicians and un-sanitized test weights in your plant. Our systems were designed to reduce service costs, to increase production by reducing down time, and providing our customers with the simplest of tools to make them self-sufficient. It just turned out that reducing service visits also reduces the possibility of COVID-19 exposure. It is a smart solution whose time has come!
