Since March 2013, Endress+Hauser and its sales and service partner, Vector Controls and Automation Group, have delivered instrumentation, services and solutions to customers in the Gulf region. In effort to provide the right solutions, the companies continue to work together to better understand the industry, applications and customers' needs. The new campus will enable both teams to support customers in new ways.

With the new campus and capabilities, customers can expect:

- Sales support
- Service support
- Solution support
- Repair capabilities at new repair center
- Training – hands-on experience at the PTU®
- Calibration at new calibration center
- Local and national support on projects (MIV)

PTU[®] (Process Training Unit)

More and more professionals in the process control industry are looking for quality training to help them with their daily responsibilities. The requirements for higher productivity are ever-increasing. Companies are faced with an experienced workforce of operators and technicians that will be retiring in the coming years, and are needing to train their next generation of employees.

What makes Endress+Hauser unique is our PTU network. PTUs are full scale, working process skids with on-line instrumentation and controls. You gain hands-on experience with the types of operation, diagnostics and troubleshooting found in real-life process plants. This goes beyond what classroom-only style training can provide. These “mini process plants” feature Endress+Hauser instruments integrated with the PlantPAx process automation system from Rockwell Automation.
